It should be up to the people to decide on how they receive their entertainment, be it music, weather or news!! I pay for my cable service, by my own free will... no one tells me I can't choose what I want, so why shouldn't I be allowed to choose my listening entertainment method. Satellite radio fills a need I have as an American. I support the free choice that satellite broadcast music/information provides. Do not take this away from the American public!
